Putting it all together**

Tramont Manufacturing LLC

TRAMONT: PUTTING IT ALL TOGETHER FOR YOU

Find a gen-set anywhere in the world, and there's a good chance that it is protected by a Tramont enclosure, fueled by a Tramont tank. Tramont has been a leading provider of diesel fuel containment systems, enclosures and gen-set packaging solutions for the standby and prime power industries for almost 40 years. We combine our customer service skills, design expertise and manufacturing capabilities to deliver products that set the standard for innovation, competitive pricing and quality.

RESPONSIVE, KNOWLEDGEABLE, EXPERIENCED

Products are only as good as the people who design and build them. Tramont people have the right skills to do the job, and share a commitment to do whatever it takes to meet our customers' needs.

- **Sales and Customer Service:** The Tramont Sales Team knows our products and how they operate. We're used to dealing with complex specs and requests for proposals. And we know you expect a prompt, accurate and complete response.
- **Engineering:** Tramont has a long history serving the power generation industry, and our engineering team continues to build on that legacy. Our engineers understand that every detail must be taken into consideration in order to meet your specification. Whether it is a single fuel tank or a complex, highly customized project, we have the tools, knowledge and experience that make it possible to design products that match your structural and performance requirements.
- **Manufacturing:** Tramont's 175,000-square-foot facility includes state-of-the-art fabrication, welding and lifting machinery. The shop floor is designed for the efficient movement of work in process. Tramont is ISO-9001 certified. All of that is important, but it's only part of the story. Our manufacturing team has years of experience building tanks and enclosures, and assembling them into complete packaged units.

TRAMONT QUALITY

Quality is not a one-time goal. It is an ongoing process that involves everything we do that affects our customers.

Our guiding principles:

- Always strive to eliminate wasted time, materials and labor.
- Improve productivity and efficiency with a safe, orderly, well-organized facility and a properly trained and managed workforce.
- Learn from experience, and quickly make changes in materials, design, training and processes as needed.

From top: Members of the Sales Team respond to a customer request. Engineers work on a tank design. Welders construct a tank. Enclosure undergoes a quality check prior to mounting to tank.

TRAMONT AND THE UCA GROUP: In May, 2014, Tramont Manufacturing became part of the UCA Group of companies. Headquartered in Elgin, Illinois, the UCA Group operates manufacturing and engineering companies in North America, Europe and Asia. At Tramont we are building on our past success by drawing on the UCA Group's broad-based resources, skills, knowledge and purchasing power.

What Tramont Manufacturing can do for you

Here is a brief look at the multiple ways Tramont can meet your needs for fuel containment systems, enclosures, gen-set packages and more.

Day Tanks

Tramont offers three models, each available 10 to 1000 gallons. UL 142 and ULC S601 Listed.

TRX: Basic tank, no pump or motor, used as main or storage tank

TRE: Tank with pump and motor to pull fuel from main tank to supply generator, gravity overflow

TRS: Includes System 2000 PLUS™ controller to monitor and control pump and motor and provide alarms for various fuel level conditions

Multiple options available, including:

- Custom dimensions
- 10 to 350 gallon OSP seismic certification
- Open or sealed containment basin with 150% or 200% of internal tank capacity
- On TRE and TRS, various sized pumps and motors
- On TRS, reverse pump return, duplex pumps, weather-resistant cover
- Standard paint gloss grey, custom colors available

TRS day tanks.

Sub base tanks ready for shipment from Tramont.

Sub Base Tanks

Tramont offers a wide selection of standard sizes, and can also custom design tanks to meet your special needs. Tanks are UL 142 and ULC S601 Listed. Sub base tanks are available 60 to 10,000-plus gallon capacity and include a secondary containment basin. Multiple options available, including:

- Fire-rated UL 2085 Listed
- Day tank configuration
- Spill/fill box
- Diamond plate tank surface
- Isolator skirt to close gap between gen-set and tank
- Standard paint gloss black, custom colors available

Cylindrical main tanks.

Main Tanks

For above-ground applications where larger fuel capacity is required or as a main fuel tank for a day tank. Custom-designed cylindrical and rectangular tanks are UL 142 Listed. Also available as UL 2085 fire-rated and with day tank controller.

Mobile Power

Tramont POWERTRAK™ trailers provide an onboard fuel source for mobile standby power applications. Trailers meet D.O.T. standards. Order as a stand alone unit, or packaged with your gen-set and enclosure. Standard features include DOT/ICC lighting with six-pole connector plug; adjustable height pintle/ball hitch; adjustable front jack stand and two adjustable rear jack stands; heavy duty fenders coated with non-skid material on top surface; electric all-wheel brakes; tie-down brackets for shipping. Multiple options available, including single, dual or triple axle design.

Trailer as stand alone unit and as part of a complete gen-set/enclosure package.

Walkways

Custom-designed configurations make it easy for service personnel to safely access elevated sections of the tank, enclosure and gen-set. Steel, stainless steel or galvanized construction. Offerings include:

- Walkways: Provide pathway to elevated doors. Designed to OSHA guidelines. Corner, dual or walk around models. Cantilevered or free standing design.
- Platform: Staircase with attached support surface allows access to elevated, outward-opening doors, designed to OSHA guidelines.
- Staircase: Provide access to elevated control panels/breakers.

Staircase and platform installed between two gen-sets.

Enclosures

Tramont POWERHOUSE™ enclosures help protect your tank and gen-set from the elements and help prevent unauthorized access. Durable powder-coat texture finish in a selection of 12 standard colors. Includes stainless steel hardware. Bolt-together construction makes it easy to repair or replace panels. Enclosures can be designed to accept internal or external silencers. Pitched roof directs water away from unit. Multiple options available, including:

- Custom colors
- Weather-protective design offers protection from wind, rain, snow, ice, sun and debris
- Sound-attenuated design offers protection from elements and provides noise reduction to customer specifications
- Steel, stainless steel, galvaneal or aluminum construction
- Wind certification to customer specifications
- IBC (International Building Code) certification

Sub base tank/enclosure package with staircase and walkway.

Gen-set Packaging

Tramont will assemble your gen-set into a complete package that may include a tank, lift base, weather-protective or sound-attenuated enclosure and walkway, all designed to your specifications. Tramont can accommodate virtually any size gen-set. The completed unit can be shipped anywhere, ready for installation.

A sub base tank is moved into position prior to mounting of the enclosure at the Tramont Heavy Lift Facility.

Parts and Accessories

Tramont offers an extensive selection of parts and accessories for day tanks, sub base tanks, trailers and enclosures. If we built the product, we can supply the replacement part or upgrade kit.

Tramont has parts and accessories for all of its products. Pictured is a selection of day tank components.
